Landscape Pro 120

Installation Guidelines

088 001

Issue No.: 01

November 2024

Landscape Pro 120

Installation Instructions

1 Clear the area of any weeds, rocks, and debris. Ideally the surface should be smooth and level before laying down the weedmat.

4 Use Landscape pins or staples to secure the weedmat to the ground. Start by securing the corners and then place pins every 30-40 cm along the edges and in the middle.

2 Measure the area where the weedmat will be installed. Cut the Landscape Pro Weedmat to size, leaving extra material around the edges for secure placement.

5 If planting through the weedmat, use scissors or a utility knife to create small slits or X-shaped openings where plants will be placed. Be careful not to make the openings too large.

3 Lay the cut weedmat over the prepared area, making sure it is flat and free of wrinkles. Overlap multiple pieces by at least 10cm to prevent weed growth at the seams.

6 Cover the weedmat with mulch, stones, or your preferred ground cover to protect it from UV damage and enhance the appearance of your landscape. Your installation is now complete!
