BioWool

WOOL MATTING

Cirtex BioWool is a biodegradable wool matting for erosion and sediment control and landscaping applications.

BioWool is ideal for protecting cut faces and exposed soil from erosion due to wind and water and around horticultural plantings.

In addition to the erosion control function, BioWool allows moisture penetration to assist vegetation establishment while insulating the seed and root zones from extremes of heat.

BioWool is nonwoven, 100% Pure wool matting and is manufactured in New Zealand using recycled wool and fleece wool making it a sustainable resource product.

FEATURES >

- ✓ **Fully biodegradable** product providing plants with nutrients as it degrades making it an **environmentally friendly product**
- ✓ Allows water to pass through and **reduces evaporation**
- ✓ Provides a temperate environment for plants **minimising the effects of colder weather**
