

CASE STUDY LAWN REINFORCEMENT FOR BOAT PARKING MARAETAI, AUCKLAND

SUREFLEX GRASS REINFORCEMENT

APRIL 2019

CLIENT	Residential Home Owner
LOCATION	Maraetai, Auckland
PRODUCTS USED	SureFlex Grass Reinforcement

**ADVANCED
GEOSYNTHETIC
SOLUTIONS**

PROJECT

Cirtex was approached by a residential home owner for a solution to their lawn getting destroyed by parking their boat on the grass. What they really wanted was some form of reinforcement they could add to their grassed slope to allow them to easily access their boat while keeping the grass in a great condition.

DESIGN

Cirtex worked closely with the client to provide a solution using the SureFlex roll out Grass Reinforcement product. Special consideration had to be made for the gradient of the slope and services beneath the surface.

INSTALLATION

The client was able to install the product with ease due to the responsiveness and accessibility of the customer service team. Cirtex was able to deliver to meet the tight time frame of the client and had the product supplied to site the day following dispatch.

The products used provided the following benefits to the project:

- Long term protection of the lawn
- Ease of parking the boat - particularly during the winter months
- Prevention of mud
