BioCoir

COCONUT MATTING

BioCoir is a biodegradable coconut fibre for erosion and sediment control and landscaping applications.

BioCoir is ideal for protecting cut faces and exposed soil from erosion due to wind and water.

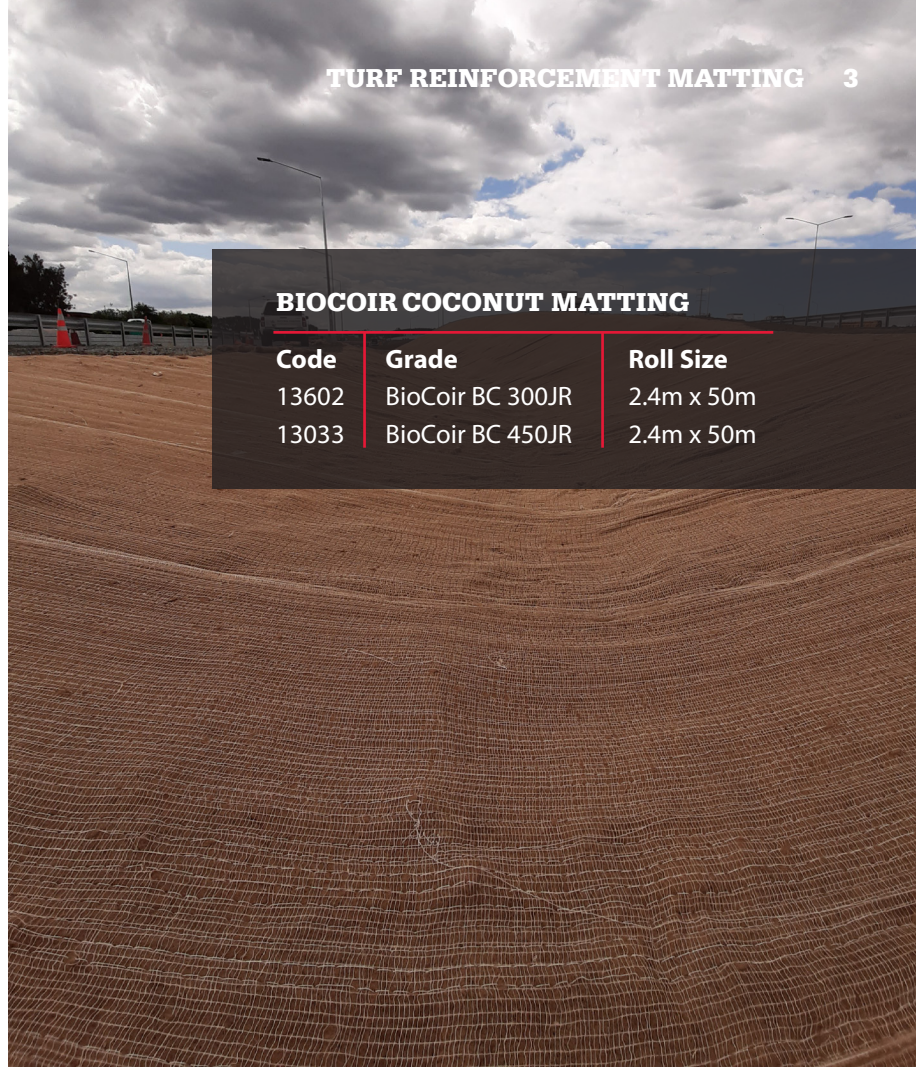

In addition to the erosion control function, Cirtex BioCoir allows moisture penetration to assist vegetation establishment while insulating the seed and root zones from extremes of temperature.

BioCoir BC300JR and BC450JR have a jute net to reinforce the product, making it 100% natural fibre.

FEATURES >

- ✓ **Biodegradable**
- ✓ **Promotes growth** of vegetation
- ✓ Positive **natural advantages** over synthetic products
- ✓ **Protects exposed soil** from wind and water
- ✓ **Retains moisture**
- ✓ Made from sustainable **natural coconut fibres**
