SUREFLEX

ROLL OUT GRASS PROTECTION

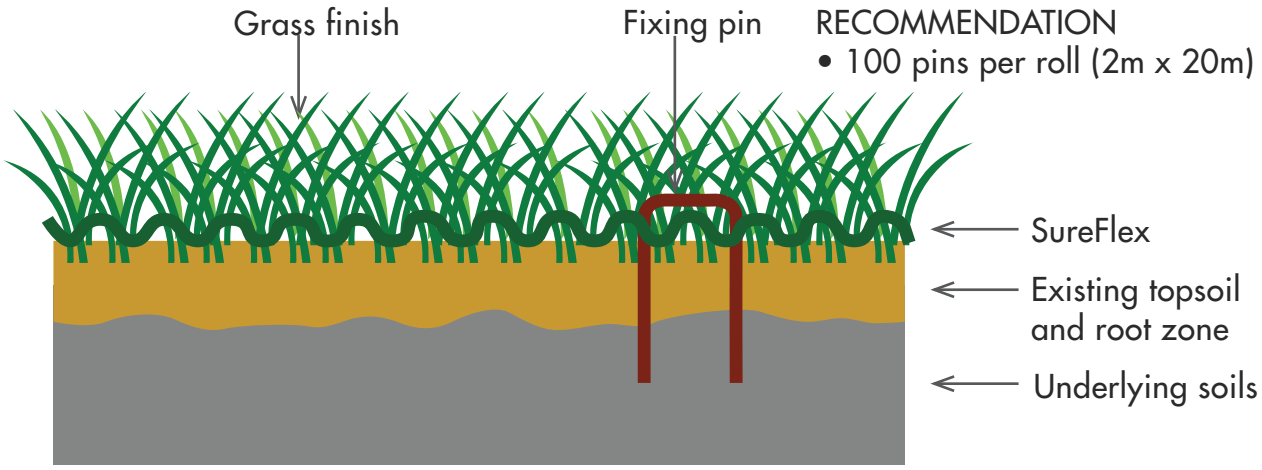
SureFlex grass protection mesh is an effective way to protect grassed areas from pedestrian and vehicle damage.

It is a cost-effective yet robust solution for protecting grassed areas from excessive wear, rutting, skidding, mud and damage caused by pedestrian and vehicle traffic.

Available in two different grades, GP1800 for the more demanding applications and GP1400 for applications where there is only light vehicle or pedestrian movement.

SureFlex is manufactured using an improved method of extrusion and combining more than one material into the product. It has superior slip resistance and is over 30% stronger when compared to other extrusion methods (tested to BS 7976-2). Improved flexibility makes the mesh quicker and easier to install.

SUREFLEX INSTALLATION INFORMATION



FEATURES

- Quick, easy installation
- Excellent slip resistance
- Promotes natural grass growth
- Permanent or temporary
- Strong & reliable
- Low visual impact
- Lay over existing grass

APPLICATIONS

- Grass car parks
- Golf cart paths
- Overflow car parks
- Pedestrian paths
- Wheelchair access routes
- Emergency access
- Caravan parks and bays
- Event access
