# EnviroSieve Turbidity Curtains

Working in sensitive marine and freshwater environments requires special care to protect the surrounding ecosystem. EnviroSieve Turbidity Curtains are ideal for containing waterborne sediment to the immediate working environment.

Incorporating an EnviroSieve Turbidity Curtain in your project can avoid costly fines from inadvertently breaching environmental compliance requirements.

The main curtain is manufactured from a heavyweight nonwoven geotextile, with a high visibility canvas float and a pocket carrying a chain weight at the base. Each curtain has a zip at each end, allowing them to be connected to form longer lengths as required.

## FEATURES >

Fast and **easy to install**

Standard size supplied with **strong zip for connecting curtains** together

Standard size **supplied with chain weight installed**

**High visibility** floating device

**Wide range** of depths and lengths

Curtain **filter material** adjusted to suit conditions

**UV resistant** flotation device

Available for **prompt delivery**

**Impermeable top** section of curtain to **contain floating contaminant** should a spill occur

## SILT CURTAINS & DEWATERING BAGS
